**Private Equity and Hedge Funds: Tax**

Pryor Cashman's Tax Group provides crucial advice in structuring and documenting private equity and hedge funds. A typical structure could involve onshore and offshore components as well as blocker corporations in various jurisdictions in order to optimize the tax treatment for the sponsor and different classes of investors. We also have experience in the tax treatment of partnerships, limited liability companies and other types of pass-through entities which are the primary vehicles for these funds.

In conjunction with our international affiliations and alliances, Pryor Cashman's Tax Group provides recommendations on offshore investment vehicles and the most beneficial jurisdictions in which to operate.
