Corporate

One of Pryor Cashman's principal strengths as a mid-size law firm, and one of our Corporate Group's greatest assets, is our ability to not only act as outside general counsel for the day-to-day legal concerns of our clients, but also to handle their large complex transactions and financing.

Our Corporate Group focuses on delivering prompt, concrete and to the point advice cost-effectively and efficiently. We begin by deriving a thorough understanding of each client's business – its stage of development and its short- and long-term objectives. In addition, an experienced senior attorney actively oversees each client's affairs since fostering and maintaining client confidence is one of our highest priorities.

Our membership in Interlaw gives us immediate access to attorneys throughout the world with specific knowledge of local laws for transnational situations.

The transactional experience of Pryor Cashman's Corporate Group encompasses all types of domestic and international corporate matters, from private placements and public offerings of securities to transnational mergers and acquisitions to complex, multiparty joint ventures. As only one example, we advised a multinational investor group leading a \$60 million equity financing for the global expansion of a wireless communication company. In the course of this representation, we coordinated the entire due diligence process across 17 projects and 11 developing countries in Asia and Latin America, negotiated contracts, dealt with regulatory requirements, and provided the information our clients needed to evaluate the risk/reward profile of each aspect of the transaction.

Our access to other specialty groups in our firm enables Pryor Cashman's Corporate Group to counsel clients in virtually all areas likely to be of concern to anyone forming, acquiring or operating a business, including general business law, executive compensation and employee benefits, labor and employment, real estate, securities and corporate finance, tax, intellectual property and licensing.

Spanning a wide variety of industries, our clients include all forms of business organizations, from pass-through entities (such as limited liability companies and partnerships) to non-profit organizations to private and public corporations. We represent institutional and entrepreneurial clients, from startups to Fortune 500 companies, with special focus on companies in the middle market.
