

Overview

Our Entrepreneurial Perspective

Bucking the 21st century's bigger-is-better evolution, Pryor Cashman successfully balances the highly professional with the personal. As a premier, mid-sized law firm in New York, we are known for getting the job done right and doing it with integrity, efficiency and élan.

With over 120 attorneys in our offices at 7 Times Square (and an office in Los Angeles), we have assembled the finest legal minds and business acumen in 15 different practice groups encompassing 89 different practice areas.

We consider ourselves an entrepreneurial law firm, unencumbered by bureaucracy – able to break new ground with unique approaches. An environment where lawyers make independent, informed and creative decisions on behalf of their clients – eliminating logjams and avoiding wasteful over-lawyering. In fact, we are known for our expeditious and creative handling of complex challenges, our accessibility, our practicality, and equally important, our cost-sensible solutions.

Looking at Things Your Way

We know that solutions don't happen in a vacuum. Problems cannot be solved without a deep understanding of the business and circumstances under which the problem arose. This is why we become specialists in your business, acting as valuable partners to you with impressive legal expertise.

Whether we are counseling a multi-tiered institution or an individual, we know that, as is often the case with a complex work of art, it takes looking at things from multiple perspectives before one can see the entire picture.

Throughout our 47-year history, Pryor Cashman's attorneys have made it a priority to focus on clearing the path for our clients to achieve their distinct goals while at the same time reducing risk and gaining competitive advantage.

Pryor Cashman is also a member of the International Alliance of Law Firms, a network of select, business-oriented, full-service law firms. At present there are 53 member firms in 38 countries throughout North and South America, Europe, Asia and Africa.
